Employment Opportunities

We need **Motivated, Competent Individuals** for the following position:

Toolmaker / Moldmaker-EDM Department

KVI, a leading manufacturer in the Aerospace and Medical Device industries provides Ultra Precision CNC Machining, Tooling and EDM services to the world. We are seeking a highly experienced, quality driven, productive person to fulfill our EDM Team Leader position. Full / Part Time

Job responsibilities include:

- Programming, setting up, and operating CNC and manual ram &/ or wire EDM's

- Programming, setting up, and machining / grinding copper and graphite electrodes

- Estimating ram EDM requirements

- Designing and building workholding tooling

- Work with production control on setting production schedule

- CAD /CAM skills, fixture design and programming experience preferred

Join our team and enjoy working as part of a close-knit group focusing on a high level of customer service in a solid company with a great future. We are a quality driven, productive organization where you can advance your skills and experience. Come work in a place where your opinion is heard and valued. We offer an excellent work environment in a clean, high-tech facility. Perhaps you've spent many years on the shop floor and are ready to step up into another position.

Job Requirements:

Must have experience working in CNC shop environment. Must have experience with complex parts that require multiple operations. Auto CAD or Solidworks Experience Preferred. Proven ability to make clear, accurate decisions and strong verbal and written communication skills. Must be a multi-tasking self starter who knows what 'Quality' means. Very competitive compensation for highly qualified applicants.

- CNC/Manual EDM Programming, Set Up and Run Experience

- CNC Machining Experience

- Grinding Experience
