MACHINING/PROGRAMMING/ENGINEERING

Aerospace/Medical Precision Machining Co. seeks highly talented individual for manufacturing and quality planning position.

Initiative, good character and a complimentary fit are important to us, because at the cornerstone of our company culture are extraordinary people dedicated to delivering outstanding services to our customer. This position includes:

Be responsible for analyzing individual part drawings, developing manufacturing plans and then translating that plan into individual CAD drawings; developing work-holding design, tooling selection, fixturing and supporting inspection documentation that will allow the part to be manufactured to spec.

Additional duties will include supporting all other manufacturing related departments including Quality, Production Control and Estimating. Contact with our customers will be routine and the ability to interface with all staff levels will be important.

Required qualifications: In depth understanding of precision machining, machine tool programming and CAD/CAM for parts requiring multi axis machines for production. Must be extremely comfortable with PC based applications and systems. AutoCAD and CAM (Gibbs, MasterCam, Esprit, Catia) experience required. Formal Engineering education a plus!

Must be very task-driven/results oriented individual. Your ability to work well with others and communicate effectively verbally and in writing are critical skills for earning this position.

Our firm is a successful, growing, high precision, and quality driven machining facility, we are both ISO-9000 and ISO-13485 Certified. The environment is fast paced, rewarding and exciting. We rely on individual integrity and a strong work ethic to provide the attitude and skills needed to satisfy our customers in a very demanding marketplace. We offer excellent pay, a bright/clean & modern shop with some of the newest machine tools available. You can become a valuable part of this organization.

KVI is subject to various DoD regulations, accordingly, Applicants will be subject to a thorough background check and drug-testing.

WE ARE SEEKING INDIVIDUALS WITH DIRECT MACHINING/MACHINE SHOP EXPERIENCE. THOSE WITH LESS THAN 10 YEARS MACHINING & PROGRAMMING EXPERIENCE NEED NOT APPLY.

Please email your resume, references and salary history to: HR@KV-INC.com
